PONDOZ POND TONIC BENEFICIAL BACTERIA

POND TONIC BENEFICIAL BACTERIA is an Australian made beneficial bacteria that is derived from a blend of nature's naturally occurring beneficial bacteria.

POND TONIC BENEFICIAL BACTERIA is one of the most concentrated beneficial bacteria products on the market. To see how strong **POND TONIC BENEFICIAL BACTERIA** is take a look at our brochure in the downloads section for images taken using a microscope. These microscope images show the concentrations levels of **POND TONIC BENEFICIAL BACTERIA** & other bacterial products on the market.

POND TONIC BENEFICIAL BACTERIA has proven to reduce or eliminate Ammonia, Nitrites, Nitrates, Phosphates, Hydrocarbons, organic debris, sludge & more.
POND TONIC BENEFICIAL BACTERIA has proven to re-establish filter systems within a few days rather than weeks after crashes as well is starting new systems much quicker.

To achieve the greatest results, use **POND TONIC BENEFICIAL BACTERIA** with **POND FIX ENZYME or LAKE FIX ENZYME.** Our enzymes super charge beneficial bacteria, which gives the ultimate solution to the majority of water quality issues in ponds and lakes.

POND TONIC BENEFICIAL BACTERIA can be used in aquariums, aquaponics systems, ponds, water troughs, lakes and dams.

POND TONIC BENEFICIAL BACTERIA produces an odour that isn't pleasant, but this is the nature of beneficial bacteria when in such high concentrations.
